

1-Day Treatment Technology Workshop Agenda

Monday, October 26

9:30 am: **Check-In**

10:00 am: **Morning Session**

Environ Professional Treatment Products

- Environ's professional back bar products
- Environ's professional treatment protocols

Environ Cool Peel Technology

Discover the real benefits of chemical peeling. No longer is it necessary to torture the skin or to 'peel like a snake' in order to achieve results. In fact this is far from what is best for optimal skin health and appearance. Learn how the advanced Cool Peels create effects on the skin to make optimal appearance changes without the downtime. Proper indications, expectations, protocols, pre-post care and client follow-up will be discussed.

- Indications and types of peels for the visual appearance of problematic skins, pigmentation, fine lines, rosacea, and photo-damaged skin
- Overview of traditional chemical peels
- Environ science of skin peeling

12:00 pm: **Lunch Break**

1:00 pm: **Afternoon Session**

Focus Care Skin Tech+ Range

Environ's Focus Care Skin Tech+ Range is Performance Intelligence at its best. It is the most advanced, innovative cosmetic skincare technology in your own hands combined with highly effective ingredient combinations which, together, make a noticeable lasting difference to skin looking healthier and more beautiful.

Electro-Sonic DF Mobile utilizes the dual technology of low frequency sonophoresis and pulsed iontophoresis. Iontophoresis is the introduction of an ionized substance to the skin by the application of a direct electrical current to enhance effectiveness of ingredients. Sonophoresis is a safe, noninvasive treatment that uses low frequency ultrasound technology to enhance the speed and delivery of ingredients to enhance the appearance of the skin.

Environ's cosmetic micro-needling instruments are meticulously crafted medical-grade precision micro-needling at-home devices. They are designed to safely and effectively deliver more essential nutrients and intelligent ingredient combinations to where the skin needs them most.

Electro-Sonic Ionzyme DF Machine

For over 30 years, Environ has remained at the forefront of skincare innovation with revolutionary product formulations and pioneering skincare technologies. Developed by Dr. Des Fernandes, world renowned plastic surgeon, the revolutionary DF Machine combines the efficacy of low frequency Sonophoresis with pulsed Iontophoresis all in one probe. Environ's scientifically proven Dual Technology harnesses the power of both modalities to speed up and intensify treatment results.

Technology Demonstrations

4:30 pm: **Workshop Adjourns**

Come Meet Melanie Vorvick!

Melanie is a passionate and results-driven National Trainer for DermaConcepts. She is known for delivering impactful training and education within the skincare industry. Working with leading skincare brands over the course of her career she is skilled in delivering dynamic presentations across small and large settings. Melanie loves simplifying complex, technical information into engaging, accessible content that drives brand loyalty and sales. Environ's message of making skin beautiful for life resonates deeply with Melanie's own philosophy as an esthetician of 20 years.
