Hormonal Skin Care

Hormonal changes, experienced through life, are often reflected in the skin's appearance. The appearance of skin contributes significantly to the self-confidence of women of all ages. The symptoms and effects of hormonal changes on the skin are different in everyone and are as individual as a person's own genetics. Environ has gathered insights, from consumer studies, in order to make a meaningful contribution toward supporting women in their well-being and promoting age-inclusive beauty.

ACNE:

Beyond its physiological manifestations, acne can cause substantial psychological distress. In this context, the role of skincare professionals becomes indispensable as we can provide both scientifically sound interventions and support to lessen the toll of acne on our clients. Have a deeper understanding of what acne is, how it is classified and what solutions and recommendations can make positive improvements.

PREGNANCY:

With pregnancy comes many changes to hormones, which affect skin well-being. Pregnant women are often unsure which treatments are available to them. This guide can aid you in answering two questions that Environ keeps top of mind:

- How does pregnancy impact the skin?
- What can safely be recommended to our pregnant clients?

MENOPAUSE:

With the hormonal changes that come with pre-, peri- & post-menopause, women will experience many physical changes. Since menopause is inevitable for all women, it's important to understand its effects more significantly. Learn the impact menopause has on the skin and what solutions and recommendations will be most effective and why.

Environ Cool Peel Technology

Discover the real benefits of chemical peeling. No longer is it necessary to torture the skin or to 'peel like a snake' in order to achieve results. In fact this is far from what is best for optimal skin health and appearance. Learn how the advanced Cool Peels create effects on the skin to make optimal appearance changes without the downtime. Proper indications, expectations, protocols, pre-post care and client follow-up will be discussed.

- Indications and types of peels for the visual appearance of problematic skins, pigmentation, fine lines, rosacea, and photo-damaged skin
- Overview of traditional chemical peels
