PRESS RELEASE: USA, February 2022

## ENVIRON SKIN CARE USA LAUNCHES THE REVOLUTIONARY FOCUS CARE SKIN TECH+® ELECTRO-SONIC DF MOBILE

The Covid-19 pandemic has driven demand for results-driven “at-home” skincare technology and tools. Consumer awareness is at an all-time high, which has perfectly primed the opportunity to offer remarkable skincare results, in less time, thanks to the power of Environ’s industry-leading professional skincare technology, now available for home use.

### TECHNOLOGY PIONEERED BY DR. DES FERNANDES

The Electro-Sonic DF Mobile was pioneered by Dr. Des Fernandes (Environ Founder and Scientific Director) as a technologically advanced approach to noticeably improve the overall look and feel of skin health, texture and youthful radiance.

*“As part of my personal mission to future-proof skin around the globe, I wanted people to be able to harness the power of Environ’s DF Technology from the comfort of their home and support their Environ Professional Facial Treatments.”*

### ABOUT DUAL ELECTRO-SONIC DF TECHNOLOGY

This award-winning, revolutionary hand held skincare technology combines low frequency sonophoresis and pulsed iontophoresis through one treatment probe. It is intended to improve the efficacy of skincare for cosmetic applications. DF Technology is scientifically shown to offer the benefit of delivering more essential nutrients to where the skin needs it most.

## PERFORMANCE INTELLIGENCE COMBINES DF TECHNOLOGY AND POWERHOUSE FORMULATIONS

The DF Mobile should be used with targeted serums from Environ’s Focus Care range to optimize results in the following areas:

- Frown lines
- Lines and wrinkles around the eyes
- Upper lip lines
- Hyper-pigmented marks (due to photo-damage)
- Double chin
- Minor scars
