CLARITY+

Q: How does Environ's Focus Care Clarity+® Range help to target the effects of the root causes of breakouts?

A: The Clarity+ Range is an innovative 3-phase system offering a complete skincare solution. Each phase contains products that have been specifically formulated to target the effects of the root causes of breakouts by giving your skin exactly what it needs where it needs it most.

Phase 1: CLEAN - using Sebu-Wash and Sebu-Tone helps to combat the appearance of congestion and excess surface oil.

Sebu-Wash: washes away dirt and excess surface oils.

Sebu-Tone: helps remove surface dead skin and the look of oily shine.

Phase 2: CONTROL - using Sebu-Lac Lotion and Sebu-ACE Oil helps to counteract the visible progression of conspicuous spots while Sebu-Spot Blemish Gel helps to target them.

Sebu-Lac Lotion: assists in improving the appearance of skin texture.

Sebu-ACE Oil: helps nourish the look of skin with essential vitamins A, C and E.

Sebu-Spot Blemish Gel: targets and minimizes the appearance of spots.

Phase 3: CLEAR - using the Sebu-Clear Masque every second day in the evening helps to reduce the appearance of confidence-crushing breakouts.

Sebu-Clear Masque: clears the appearance of existing breakouts and assists in the look of skin renewal and rejuvenation.

Q: Can the Focus Care Clarity+® Range be used in conjunction with other Environ products?

A: Yes. You could add the Comfort+ Colostrum Gel into your evening routine and you should, in time, also step up your daily dose of topical vitamin A using targeted Environ Skin Care products. Always consult your Skin Care Professional about the most effective skincare routine for your skin needs.

Q: Can the Focus Care Clarity+® Range be used on all skin types and tones?

A: Environ has trialed the Clarity+ Range on a variety of skin types and photo-types.

Q: How long before I can expect to see results using the Focus Care Clarity+® Range?

A: Problematic skin is a complex skin condition so results will vary from person to person depending on the severity of the infection. That said, most people can expect to start seeing improvement in the appearance fairly soon after using the Focus Care Clarity+® Range.

In the clinical trials run by the Environ Skin Care Institute, 100% of the trialists said that they would recommend the Clarity+ Range because they felt that the appearance of their breakouts had been successfully treated.

Key to the range's success is the combined daily use of the Sebu-Lac Lotion and Sebu-ACE Oil, and the addition of the Sebu-Clear Masque every second day.

For optimal results, you should combine the Clarity+ Range with a course of Environ Professional Peels.
